

This handy form helps show you how to measure your windows to enable you to get a quote for your shutters.

Don't worry – the measurements don't have to be spot on. Giving us the approximate width and height of each window will be enough to give you ballpark price for your shutters.

Remember – unlike other shutter quotes you may get, **our prices include installation and VAT.**

Inside Mount

- Your window will look like that shown. An inside mount window typically has a sill and space inside the window to mount the shutters
- Measure as shown placing the tape *inside the recess*

Inside Mount

Outside Mount

Outside Mount

- Your window will look like that shown. An outside mount window has no recess and will have the shutters mounted onto the window architrave (such as on Victorian windows) or onto the wall.
- Measure as shown

Plantation Shutters Window Measuring Form

Print as many of these pages as required.

Please note each window in a bay counts as one window, for example for a four section bay we will need four window dimensions
